

SUPER Z[®]

Cable Chain

"Z" Performance for light trucks, SUVs and 4x4s at a moderate price.

Super Z[®] (ZT700 series) is Super Z's SZ300 series companion product for sport utility vehicles and pickups. The design is the same as Super Z's SZ300 series, but features larger and tougher components. This product also features the same "designed-in" rubber tightener as the SZ300 series so there is no need to stop and retighten. Super Z[®] covers the majority of light truck tires with only five stock numbers.

- Fastest, easiest installation of any traction product with included rubber tighteners.
- Super Z[®] meets Class "S" clearance requirements for vehicles with limited or low clearance.
- Better compatibility with anti-lock brakes, traction control, all-wheel drive and other electronically monitored control systems.
- Super Z's plastic package includes a pair of rubber tighteners, step-by-step installation & removal instructions and plastic gloves.

Chain tighteners ARE required and included.

Super Z[®] (Pickup & SUV)

Meets S.A.E. Class "S" Requirements

Packaged: 1 pair per box / 4 pair per master carton

Order unit: Pair

◆ This is only a partial listing of tire size applications. For complete, up-to-date listings, please refer to our most current Winter Traction Product Tech Guide & Tire Size Directory, or visit www.scc-chain.com. Refer to vehicle owner's manual for any traction product limitations.

IMPORTANT INFORMATION FOR PICKUPS, SUVs & 4x4s:

Many western states and Canadian provinces have mountain passes and roadways where the possession and use of winter traction devices are required by law, regardless of vehicle type, under certain winter conditions. A failure to comply with these requirements can result in fines and/or other penalties imposed by local authorities. For current, up-to-date information regarding chain laws, restrictions and regulations, as well as the most complete tire size application listing, refer to SCC's Winter Traction Tech Guide and Tire Size Directory or visit www.scc-chain.com

Many pickups and sport utility vehicles have restricted clearances around the drive tires. Vehicle manufacturers recommend using only traction products that meet S.A.E Class "S" clearance specifications. Super Z6[®], Super Z8[®], Super Z[®] & Z-Chain[®] are the only SCC light truck cable brands that meet these requirements.

Traditional link chain will not meet the minimum clearance requirements.

CAUTION: When chaining up one axle of a four wheel drive vehicle, always check the owner's manual for the manufacturers recommendation as to which axle to chain up.
